- Applications: track day & light race use for all vehicle types
- Average friction coefficient of 0,41 over working temperature range of 0° - 500° C

## TL163

- Replaces DB
- Low friction coefficient with very flat torque profile
- ABS compatible, minimizing wheel lock-ups and excessive slip towards the end of the stop
- Applications: recommended for track use on rear calipers
- Reproducible and stable performance up to 750°C under all pressure and speed conditions

**WARNING**

DS2500 does not have ECE R90 certification, thus it is not recommended for road use in those countries which require ECE R90. All the other Ferodo Racing compounds are not suitable for road use. All test results above are based on various internal and external performance and driving tests including specific personal recommendations by experienced test drivers. Technical performance results are available upon request.

The charts and tables below compare the various Ferodo Racing materials and help you to go for the best option, depending on your vehicle and use.
