RACE BRED TECHNOLOGY

ROAD SPORT LINE

FEATURES

- Track level friction for reduced stopping distance
- Excellent performance in all conditions (hot/cold/wet/dry)
- Low disc wear
- Thermal underlayer to reduce heat transfer to brake fluid
- Extensive range

DS PERFORMANCE RANGE

- Comprehensive pad shape range
- Extensive application coverage
- Pad look following Racing specification
- Improved disc and pad wear performance drawn from race experience with high performance compounds

CROSS REFERENCE > COMPETITORS TO FERODO	6000

R90 APPROVAL FOR EU ROAD USE

All parts in the catalogue for European road use are R90 approved where required by law. (Models in production from 1999 onwards).

The **R90 number** is marked on pads and packaging.

SCORCHING

This operation is performed on all of the DS Performance range. Scorching consists of "burning" the surface of the pad.

This significantly reduces the bedding-in time when pads are fitted onto the vehicle.

THERMAL UNDER-LAYER

- Applied to the entire DS Performance range
- Thin layer of specific mix pressed between the backplate and the friction material
- Ensures perfect pad/plate bind
- Works as thermal barrier preventing heat transfer through the caliper to the brake fluid

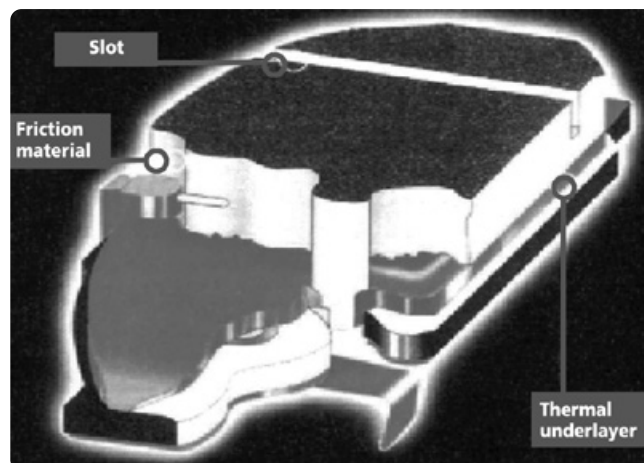

LIMITED DISC WEAR

Many high performance materials are too aggressive and can cause excessive disc wear.

DS Performance is formulated to give minimal disc wear for a high performance product.

REFINEMENT

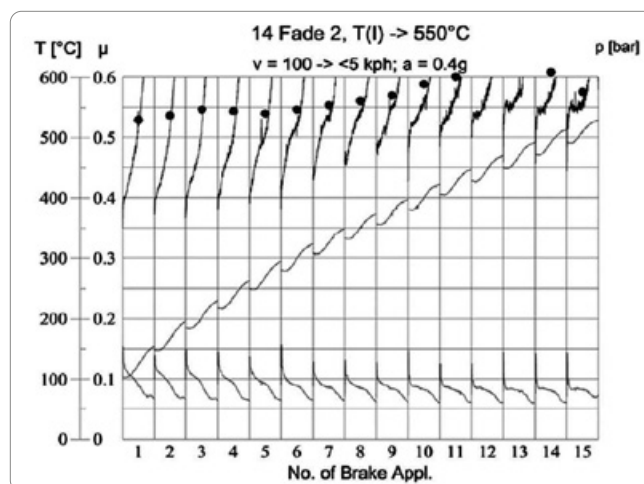

DS Performance has been developed to deliver great comfort, combining passenger car refinement with pedigree performance.

EXCELLENT PERFORMANCE

With a μ of 0.55+ DS Performance pads deliver a superb performance both hot and cold.

Excellent wet recovery properties, great resistance to fade and consistent pedal feel complete all the requirements for a safe, reliable and efficient high performance brake pad.

FDS > OE/OEM EQUIVALENT (R90 APPROVED)

- Part numbers have an equivalent OEM pad, which is identified with the prefix "FDB" in the Ferodo Aftermarket range
- Part numbers have **R90 approval** for European road use if required (models in production 1999 onwards)

FDSR > UPGRADE KITS (NO R90)

- Part numbers have a RACING-only equivalent pad, which is identified with the prefix "FRP" in the Ferodo Racing range
- Or are pads fitting into upgrade kits of brake system manufacturers (BSM)
- Part numbers require **no R90 approval** for road use since the brake system is not fitted as standard on production models

FDSE > OUTSIDE EU (NO R90)

- Part numbers are specific to the US and Asia-Pacific market
- Part numbers require **no R90 approval** for road use since they are for use outside the European Community

* For some applications in this catalogue the proposed part number will fit the specified vehicle, but may be different in some minor details to the bespoke OE pad - in almost all cases these differences are in thickness or wear indicator type (or absence thereof). Thickness will never exceed that of the OE base pad and will be no more than 2mm thinner.
